

# Log for maintaining the Wheelchair Accessible Vehicle (WAV)

The WAV should be checked once every two weeks. Any concerns are to be reported directly to us, these include tyre pressures lower than 33 psi or the oil dipstick showing less than a quarter full - we will rectify. We will also wash the exterior of the car. Tyre pressure gauge is with the tools in the kitchen.

Sign in each column to show the job has been done.

Date	Tyre pressures ok? (36psi)	Oil dipstick level?	Windscreen washer topped up?	Glass cleaned?	Interior cleaned?
